Recd June 13 by Prof Reis

2100 Pine St. Phila.
5-1-1877

Dr George Engelmann
Dear Sir: -

This note will be presented to you by my friend Dr. Jayme Batalha Reis the Professor of Agriculture in the Royal Agricultural College of Portugal at Lisbon, and Commissioner to the United States in the interest of all Departments of Agriculture. He is at present investigating the conditions of the grape culture, and hopes that you may be able to aid him in acquiring a knowledge of the species of our native grapes. I consider myself fortunate in being the medium of introducing Dr. Reis to your kind consideration, and

am very truly yours

E. W. Pope
